Another problem with the blood evidence is that Darlie's nightshirt was cut and removed from her while she was treated by a paramedic. Though special care should have been taken to preserve the bloodstains on the shirt it appears the shirt was eventually placed into a bag prior to being dried.

The Blood Evidence « The Darlie Routier Case

The hypothalamic-pituitary-adrenal axis (HPA axis or HTPA axis) is a complex set of direct influences and feedback interactions among three components: the hypothalamus, the pituitary gland (a pea-shaped structure located below the thalamus), and the adrenal (also called "suprarenal") glands (small, conical organs on top of the kidneys).. These organs and their interactions constitute the ...

In an article for The Huffington Post titled "A Patient Walks Into a Sleep Clinic With Too Many Red Blood Cells..." Joseph Ojile, MD, FCCP, DABSM, explores the association between a high hematocrit (when the percentage of red blood cells is above the upper limits of normal) and sleep disorders. As obstructive sleep apnea (OSA) can be a possible cause of elevated red blood cell count, Ojile ...

Sleep Disorders and Red Blood Cell Count: What's the ...

Every time the heart beats it is pushing out blood, which is full of oxygen, throughout your body. This oxygenated (which means full of oxygen) blood travels throughout your body in tubes called blood vessels. The cells in your body remove the oxygen from the blood as it travels by and use the oxygen to energize and stay healthy. By placing your fingers over a blood vessel close to the surface ...
