Level Flight at  $Cl=x.xx$  - This appears only on the in-flight analysis, and only if the wing area and airframe weight were specified. It indicates the speed at which the aircraft will neither gain nor lose altitude with the throttle set appropriately (this will be indicated as a percentage in the Stats section at the top of the window), and the control surfaces at neutral.

Etymology. Construction is a general term meaning the art and science to form objects, systems, or organizations, and comes from Latin constructio (from com-"together" and struere "to pile up") and Old French construction. To construct is the verb: the act of building, and the noun construction: how a building was built, the nature of its structure.
