Marketing is all about knowing your customers and the best way to respond to them. That's why marketers love data. I've spent much of my career working on software that helps marketers understand what their customers are doing, and how to best respond.. All this data is great, and we need to know it.

### **3 Psychographic Gems You MUST Know About ... - Crazy Egg**

But there's a problem with both of these theories. Plants and microorganisms, otherwise known as "things without brains," have dormant states that are very similar to sleep, which kind of puts doubt on the whole "sleep is good for the brain" theory. Then there's the fact that scientists have found certain humans who can go without sleep with no ill effects.

### **8 Simple Questions You Won't Believe Science Can't Answer**

Misc thoughts, memories, proto-essays, musings, etc. The most recent SEP entry on logical empiricism really reinforces how much America benefited from WWII and the diaspora of logicians, mathematicians, philosophers and geniuses of every stripe from Europe (something I've remarked on while reading academic biographies). You can trace back so much in just computing alone to all of their work!

6. Summary: When based on user research, personas support user-centered design throughout a project's lifecycle by making characteristics of key user segments more salient. The field of user experience centers on the idea that we must design products around people, rather than teaching people how to use products: user-centered design (UCD), not technology-centered design.

Planet Nine is a hypothetical planet in the outer region of the Solar System. Its gravitational effects could explain the unusual clustering of orbits for a group of extreme trans-Neptunian objects (eTNOs), bodies beyond Neptune that orbit the Sun at distances averaging more than 250 times that of the Earth. These eTNOs tend to make their closest approaches to the Sun in one sector, and their ...
