Fedora Server is a powerful, flexible operating system that includes the best and latest datacenter technologies. It puts you in control of all your infrastructure and services.

### **Get Fedora: download our Linux-based OS for developer ...**

Tip: When you make this decision, think about who can access the parent site, and whether you want those people to also be able to view and/or make changes to your project site. You may find it more appropriate to use unique permissions for your project site, if your project information needs tighter security. See Introduction: Control user access with permissions for more info.

### **Get started with a project site - Office Support**
