Textile arts are arts and crafts that use plant, animal, or synthetic fibers to construct practical or decorative objects.. Textiles have been a fundamental part of human life since the beginning of civilization. The methods and materials used to make them have expanded enormously, while the functions of textiles have remained the same.

Textile arts - Wikipedia

Generally, a set number of yarns are used for the formation of fabrics. Also, a number of techniques are used for producing fabrics such as weaving, knitting, and felting. The type of fabrics varies by the fibres, the fabric formation techniques, machinery used for producing them, and finishing techniques. Fabrics can also be made differently based on the end-usage.

Textile Fabric Types - different types of fabrics and ...

There are certain technical tests performed for identifying various fibers. These tests require high technology laboratory equipment and are much more reliable than the non technical fibre tests.
