International Of Cytology Volume 153

Urinary tract cytology is a common diagnostic test used in the initial work up of bladder cancer. Since its inception as an utilizable diagnostic technique by Dr. Papanicolaou in 1945, urinary cytology has proven to be a cheap, easily obtained, and accurate method in the detection of high-grade urothelial carcinoma.

The Paris System: achievement of a standardized diagnostic ...

Germ cell tumors (GCTs) are classified as extragonadal if there is no evidence of a primary tumor in either the testes or the ovaries. Extragonadal GCTs typically arise in midline locations, and specific sites vary with age. In adults, the most common sites are the anterior mediastinum ...

Intracranial germ cell tumors - UpToDate

Key Points. Question Can the diagnosis of benign disease or cancer in thyroid nodules with indeterminate cytology be established by molecular testing instead of diagnostic surgery?. Findings This prospective, blinded, multicenter cohort study of a multigene genomic classifier (ThyroSeq v3) test included 257 indeterminate cytology thyroid nodules with informative test results.

Performance of a Multigene Genomic Classifier in Thyroid ...

The management of intraductal papillary mucinous neoplasm (IPMN) continues to evolve. In particular, the indications for resection of branch duct IPMN have changed from early resection to more deliberate observation as proposed by the international consensus guidelines of 2006 and 2012.

Revisions of international consensus Fukuoka guidelines ...

Diagnosis and Treatment of Non-Muscle Invasive Bladder Cancer: AUA/SUO Guideline provides a risk-stratified clinical framework for the management of non-muscle invasive bladder cancer. Diagnosis and use of urine markers is discussed in addition to variant histologies, resection, intravesical therapy, BCG therapy, cystectomy, enhanced cystoscopy, and patient follow up.

Bladder Cancer: Non-Muscle Invasive Guideline - American ...

Since the launch of the global strategy to eliminate viral hepatitis as a public health threat by 2030,

the predominant focus of efforts for hepatitis C has been on treating adults, and for hepatitis B, on improving preventive measures such as infant hepatitis B vaccination to halt new infections.

Silver is used widely in wound dressings and medical devices as a broad-spectrum antibiotic. Metallic silver and most inorganic silver compounds ionise in moisture, body fluids, and secretions to release biologically active Ag⁺. The ion is absorbed into the systemic circulation from the diet and drinking water, by inhalation and through intraparenteral administration.

A Pharmacological and Toxicological Profile of Silver as ...

The term monoclonal gammopathy of renal significance (MGRS) was introduced by the International Kidney and Monoclonal Gammopathy Research Group (IKMG) in 2012.

The evaluation of monoclonal gammopathy of renal ...

A Absolute electrode potential In electrochemistry, according to an IUPAC definition, is the electrode potential of a metal measured with respect to a universal reference system (without any additional metal-solution interface). Absolute pressure Is zero-referenced against a perfect vacuum, using an absolute scale, so it is equal to gauge pressure plus atmospheric pressure.
