Beano is an enzyme-based dietary supplement that is used to reduce gas in the digestive tract, thereby improving digestion and reducing bloating, discomfort, and farts caused by gas. It contains the enzymes alpha-galactosidase ( $\alpha$ -GAL) and invertase. It was introduced as a liquid, but that has been discontinued and it is now available only as tablets and strawberry-flavored "Meltaways".

1. Introduction. Dietary supplements, as defined by the Dietary Supplement Health and Education Act of 1994 (DSHEA) in the United States, are products intended to supplement the diet that contain vitamins, minerals, amino acids, other dietary substances, and/or herbs or other botanicals (Abdel-Rahman et al., 2011). They are further defined as only including products intended for ingestion, not ...
