I'm in the process of installing a client's ASP.net site on a Windows Server 2003 box running Sql 2008. The site uses Report Viewer 2012, but when I attempted to install it on the server, I got the message "CLR Types for Sql Server 2012" were missing.

Install SQL CLR types & Report Viewer 2012 on Ssql 2008 ...

Listing 1: Creating the LastYearSales table . The script should be fairly straightforward. I use a SELECT...INTO statement to retrieve data from the Sales.vSalesPerson view and insert it into the newly created table. However, to demonstrate how to handle errors, we need to add one more element to our table: a check constraint that ensures the SalesLastYear value is never less than zero.

Handling Errors in SQL Server 2012 - Simple Talk

Hello Julie, I am having issue on finding package into SQL 2012 integration Services catalogs. I don't see some packages are out there in SSISDB folder under catalogs, but not the one I am looking, However I see them when I browse them under scheduled job : Steps-> Edit -> Package. server location is localhost (.) so I would like to import them into SSDT. any help will be appreciated

If SQL Server Express is not the only instance, it might be necessary to UNASSIGN port 1433 on other instances. I had a 2008 R2 default instance (MSSQLSERVER), and the only way I can connect to both of them from outside is to assign port 1433 to the 2012 instance (per above) and change the port assignments for the older default instance to TCP Dynamic Ports = "0" and TCP Port = "" (blank).

Enable remote connections for SQL Server Express 2012 ...

I have a database which is in always-on high availability mode synchronized with another database on a different instance. How can I restore from a .bak file into the primary database using T-SQL?. I'm new to high availability and I've been advised that I need to take the database out of high availability before I can do a restore and then put it back in high availability again but I'm not sure.

Restoring a SQL Server 2012 database in high availability ...

This is a completely free service provided by Microsoft. You can find additional information about it here. Conclusion Querying Microsoft SQL Server 2012/2014 validates the skills required to create database objects, work with and modify data, and finally troubleshoot and optimize queries.
