

Surface Area Of Human Body

Surface Area Of Human Body

In physiology and medicine, the body surface area (BSA) is the measured or calculated surface area of a human body. For many clinical purposes BSA is a better indicator of metabolic mass than body weight because it is less affected by abnormal adipose mass.

Body surface area - Wikipedia

References and formulas used by the Body Surface Area Calculator.. The Body Surface Area formula.. Below are the body surface area formula by Dr's Mosteller, DuBois and DuBois, Haycock and Boyd.

Calculating the Body Surface Area (BSA) formula

Body Surface Area Calculator. The calculator below computes the total surface area of a human body, referred to as body surface area (BSA). Direct measurement of BSA is difficult, and as such many formulas have been published that estimate BSA.

Body Surface Area Calculator

The BMI and BSA calculators estimate the Body Mass Index and Body Surface Area.

Body Mass Index (BMI) and Body Surface Area (BSA) - MDCalc

The surface-area-to-volume ratio, also called the surface-to-volume ratio and variously denoted sa/vol or $SA:V$, is the amount of surface area per unit volume of an object or collection of objects. In chemical reactions involving a solid material, the surface area to volume ratio is an important factor for the reactivity, that is, the rate at which the chemical reaction will proceed.

Surface-area-to-volume ratio - Wikipedia

Henry Gray (1821–1865). Anatomy of the Human Body. 1918. XII. Surface Anatomy and Surface Markings 1. Surface Anatomy of the Head and Neck Bones (Fig. 1193). —Various bony surfaces and prominences on the skull can be easily identified by palpation.

XII. Surface Anatomy and Surface Markings. 1. Surface ...

The internal surface area of the gastro-intestinal tract has long been considered to be between 180 and 300 square meters. Scientists have used refined microscopic techniques that indicate a much ...

Surface area of the digestive tract much smaller than ...

Total surface area of the cerebral cortex = 2,500 cm² (2.5 ft²; A. Peters, and E.G. Jones, Cerebral Cortex, 1984) . Total surface area of the cerebral cortex (lesser shrew) = 0.8 cm² Total surface area of the cerebral cortex (rat) = 6 cm² Total surface area of the cerebral cortex (cat) = 83 cm² Total surface area of the cerebral cortex (African elephant) = 6,300 cm²

Brain Facts and Figures - University of Washington

Human body: Human body, the physical substance of the human organism. Characteristic of the vertebrate form, the human body has an internal skeleton with a backbone, and, as with the mammalian form, it has hair and mammary glands. Learn more about the composition, form, and physical adaptations of the human body.

Hair is an accessory organ of the skin made of columns of tightly packed dead keratinocytes found in most regions of the body. The few hairless parts of the body include the palmar surface of the hands, plantar surface of the feet, lips, labia minora, and glans penis. Hair helps to protect the body from UV radiation by preventing sunlight from striking the skin.

Integumentary System - innerbody.com

The human brain is the command center for the human nervous system. It receives signals from the body's sensory organs and outputs information to the muscles.

Brain The brain aids us to think, comprehend, and create. Marked by folds that meander through the surface area of the brain, the signals in the form of information, are passed from the brain as they navigate through the spinal cord, and then transported to other parts of the body.

Human Body Diagram - Bodytomy

Pressure points are specific sensitive areas on the surface of the body. You can exploit a pressure point for many uses. Martial artists quickly disable attackers by using a simple but forced push on a pressure point. Stimulation of pressure points also helps to relieve pain and assists in massage therapy.

List of Pressure Points in the Human Body | Livestrong.com

The human body is an incredibly complex and intricate system, one that still baffles doctors and researchers on a regular basis despite thousands of years of medical knowledge.
