

The Inner Reaches Of Outer Space Metaphor As Myth And

The Inner Reaches Of Outer

This article is about the interstellar region. For other uses, see Inner Sphere (disambiguation).. The Inner Sphere is a region of interstellar space surrounding Earth to a radius of roughly 450 - 550 light-years, generally demarcated by the outer borders of the "Great Houses." Within this region of about 2 million stars, there are approximately 2000 inhabited planets.

The planets (and other celestial objects) display a remarkable similarity at the phenomenological level.

The Similarities of the Planets (and Other Celestial Objects)

Any of the four planets Mercury, Venus, Earth, and Mars, whose orbits lie nearest the Sun. The inner planets are of similar size and have high densities compared to the larger gas giants among the outer planets.

Inner planet | Define Inner planet at Dictionary.com

Wednesday Winner: Jotunheim Today's Word of the Day was chosen by Patty W. of S. Carolina who said she likes the way it sounds. Jotunheim means "the outer world, or realm of giants." Submit your favorite word here and it could be chosen as one of our Word of the Day selections!

Outer | Define Outer at Dictionary.com

The Solar System is the gravitationally bound planetary system of the Sun and the objects that orbit it, either directly or indirectly. Of the objects that orbit the Sun directly, the largest are the eight planets, with the remainder being smaller objects, such as the five dwarf planets and small Solar System bodies. Of the objects that orbit the Sun indirectly—the moons—two are larger than ...

Solar System - Wikipedia

History of the term. The terms "Outer Manchuria" and "Inner Manchuria", modeled on Inner and Outer Mongolia, were coined to support Chinese claims to Russian territory and were never used in scientific literature. "Manchuria" (subdivided into Northern and Southern Manchuria) is an accepted term for the area now belonging to China.
