

Ufad Guide Design Construction And Operation Of Underfloor Air Distribution

Ufad Guide Design Construction And

Our industry expertise, engineering and design, innovation and client focus is recognized around the world, demonstrated by our ever-expanding international network of industry partners and clients.

Underfloor Air Distribution (UFAD) Heating & Air ...

Underfloor air distribution (UFAD) is an air distribution strategy for providing ventilation and space conditioning in buildings as part of the design of a HVAC system. UFAD systems use an underfloor supply plenum located between the structural concrete slab and a raised floor system to supply conditioned air through floor diffusers directly into the occupied zone of the building.

Underfloor air distribution - Wikipedia

Overhead VAV. This has become the standard HVAC system applied to most office and commercial buildings. However, cost effectiveness and energy conservation of the system vary widely and depend on the skill of both the engineer and field installation team, and sophistication and thoroughness of the building management system and commissioning.
