Webaim Writing Clearly And

The Nature of HTML. The originators of HTML were scientists who wanted a standard means to share particle physics documents. They had little interest in the exact visual form of the document as seen on the computer screen.

WebAIM: Semantic Structure

The term alternative text, as used in this article, refers to the text equivalent for an image, regardless of where that text resides. It does not refer solely to the alt attribute of the image tag. Alt attribute will be used when referring to the attribute itself, which often will, but does not exclusively, contain the alternative text.

Medical concepts and language can be complex. People need easily understandable health information regardless of age, background or reading level. MedlinePlus offers guidelines and resources to help you create easy-to-read health materials. What are easy-to-read (ETR) materials? ETR materials are ...

How to Write Easy-to-Read Health Materials: MedlinePlus

Designers. Make sure there is enough contrast between text and its background color. According to the WCAG, the contrast ratio between text and the text's background should be at least 4.5 to 1. If your font is at least 24 px or 19 px bold, the minimum drops to 3 to 1 (though, worth noting that this is a little fuzzy because numbered sizes aren't always reflective of the visual size type).
